BODY APP™

PRACTITIONER TESTIMONIES

Vitamin supplements delivered by topical patch.

Being a medical provider, I am skeptical at first, when it comes to any new products, medications and supplements. When I was introduced to Body-app, I thought it was just like any other supplement until I applied my first topical patch which was the B12 Energy patch. Oh my goodness! What a huge difference from a sublingual supplement. I had so much energy and less stress during a very stressful week. Everyone should be on B12 Energy. I love that there is an Omega 3 topical patch which beats taking a tablespoon of fish oil.

My father, who is a big man and cannot exercise, lost 16 lbs in one month on the Weight Control patch. I highly recommend Body-App to my patients.

Tamika Boulware PA Las Vegas, NV

I have a 49 year old woman that came to me for extreme fatigue that started in January. She experienced blindness and pain in the left eye, numbness of both arms and legs, multiple falls, weakness, and dizziness. After seeing a neurologist and performing numerous medical exams, nothing could be found to explain her symptoms. Her laboratory values for B12 and Vitamin D were 192 and 12, respectively. I started her on both B12 Energy and Vitamin D patches. At her follow up appointment 2 weeks later, she reported that her energy levels improved, her dizziness resolved, and all her numbness had disappeared with the exception of a small 1 cm area on her left great toe. She is so impressed and blown away by how quickly and effectively the patches have helped her.

Personally speaking, I started using the patches after seeing how energetic Tamika was during a particularly stressful week. I have a history of hypothyroidism, iron deficiency anemia, and extreme fatigue. I work long hours and never have any energy to make dinner, let alone spend time with my husband and two very energetic Dobermans. I started with B12 Energy patch, and added on the Multivitamin patch, and now I have energy to get me through crazy, stressful days and spend time at home doing the things I love. Additionally, these patches gave me the energy I needed to get me through the week I ran out of my thyroid medication.

I have since added on the Weight control patch and lost 5 lbs in the first month and it prevents me from emotional binge eating. I love the Omega 3 patches because I hate taking large fish oil pills and I won't touch the liquid stuff. Now I can get all the protective benefits of Omega 3 and hopefully prevent the dreaded family curse of dementia. I also got an unexpected benefit: my menstrual cycles are now regular again and I no longer have any cramps.

I have been recommending Body-App patches to my staff and patients with great results.
